V. Comments About This Training: _____

Learning Objectives

Intermediate Workshop #201. Hypnosis and the Management of Acute and Chronic Pain

1. Differentiate acute and chronic pain and explain how hypnosis is integrated into treatment
2. Identify at least 3 different inductions for pain
3. Explain how chronic pain is best managed through a biopsychosocial model and how using Ericksonian multiple choice suggestions is often an efficient way to cover the layers of suffering that occur with such disorders

Advanced Workshop #301. Introducing Innovations in Clinical and Research Application

1. Describe the utility in clinical practice and research of the Hypnotic Induction Profile (HIP) and define its utility in clinical practice and research and the value of adapting hypnotizability assessments to changing delivery modalities and advancements in technology
2. Describe the digital application of the HIP, the HIP/App, how it simplifies administration of the exam, computes summary scores and stores data and the utility of the HIP summary scores, the Profile Grade and the Induction Score, in clinical research and practice
3. Define the modifications that were made to the HIP to adapt it to a remote delivery platform, the Remote Hypnotizability Induction Profile (rHIP) and its utility in clinical practice and research protocols.

Advanced Workshop #302. Principles and Techniques of Age Regression

1. Identify three methods of Clinical Hypnosis inductions utilized for age regression depths
2. Explain the role of age regression hypnosis in enhancing the augmentation of symptom reduction
3. Examine and analyze 3 cases of successful clinical hypnosis age regression symptom reduction

Intermediate Workshop #202. Ethics and Clinical Hypnosis (Note: No Ethics CE Credit Offered)

1. Describe potential contraindications for using hypnosis in clinical settings
2. Describe the ethical implications of using hypnosis via remote (i.e., teletherapy/telemedicine)
3. Describe the importance of informed consent when including hypnosis in treatment; and give 3 examples of potential conflicts of interest when using clinical hypnosis

Advanced Workshop #303. Hypnosis Research Workshop

1. Identify key components of well-designed case studies of hypnosis interventions
2. Explain the purpose and design of pilot studies and randomized clinical trials
3. Describe the process for submitting manuscripts for publication

Intermediate Workshop #203. The Nature of Hypnosis and Memory

1. Describe current literature on hypnosis and memory, and its implications for clinical work
2. Describe the legal implications of the “constructive” nature of hypnosis and memory
3. Identify at least 3 techniques for facilitating age regression; and explain how to facilitate therapeutic abreaction and methods for modulating affective intensity in age regression

Intermediate Workshop #204. Hypnotic Interventions to Augment Working through Trauma

1. Describe and differentiate between common post-traumatic reactions to chronic interpersonal violence exposure (complex/Type II trauma) vs. single-event trauma exposure in adulthood (PTSD/Type I trauma)
2. Identify at least one hypnotic intervention to augment an evidence-based overall treatment approach for PTSD/Type I trauma reactions in adults
3. Identify at least one hypnotic intervention to augment an evidence-based overall treatment approach for complex/Type II trauma reactions in adults
